

HEALTH FOR HEALERS (HFH) RESEARCH GROUP

Join Us

HFH is a collaborative group for researchers interested in practical evaluation research, including the design, implementation, and evaluation of interventions to improve physician wellness. We aim to demonstrate: (1) the relationship between physician wellness and patient outcomes and (2) interventions that improve physician wellness also improve patient outcomes and cost effectiveness of medical care.

Join us at the Health for Healers Research Group

*We believe physician
wellness is imperative*

*for improved
patient outcomes,*

*ethical and effective
training of future
physicians, and*

*the quality of life of
physicians and their
families.*
